## Testimonials

"Neet Kart® is the most innovative design I've ever seen. Revolutionary! It renders every cart I've ever used obsolete!"  
- Ed Eggleston, Libby, MT

"Neet Kart® is an indispensable assistant in the field. It allows me to move gear in and game out of remote or difficult areas easily and without excessive physical strain. Neet Kart® is a must for off-road recreation."  
- Virgil Smith, Licensed Guide, Redding, CA

"We loaded Neet Kart® with five large backpacks and cased rifles to walk four miles up a mountain logging road in pre-light conditions. The cart easily transported our gear safely and comfortably saving our backs and energy for the hunt."  
- Greg Larson, Troy, MT

"I have used Neet Kart® during the past three Montana hunting seasons. It easily allowed me to transport three 150 pound plus elk halves by myself, in one day. When loaded, the cart is a breeze to balance and walks over downed trees and rocks with minimal effort. On eastern Montana hunts for deer and antelope, the sealant-filled tire tubes performed in cactus and thorn country without any flats. Big game animals can be hauled cross-country faster with Neet Kart® than with a horse."  
- Doug Bolender, Kalispell, MT

"Last November a friend left his Neet Kart® at my elk camp, instructing us to give it a try. It had taken four of us to retrieve 2 nice bulls, 4 miles out, with my one wheel cart. Next day, my partner and I killed 2 bulls and put Neet Kart® to work. The area is rough & steep, so we quartered up the elk as we had the first 2 bulls. But, once we had all 4 quarters on Neet Kart®, only one person was needed to wheel the elk 3 miles to camp. By the time we finished with Neet Kart® & a total of 26.5 "wheeled miles", we had hauled out 9 1/2 elk & one whitetail buck, 2 elk, a yearling cow & a calf were hauled whole. Incredible! One person can do the work of four and two are needed on steep hills, going up or coming down. I am a Neet Kart® disciple... it is a great product!"  
-Mark Petroni, Ennis MT

Deer Chuck: Greetings from the Flathead! Boy...the deer are moving today! We're about 2 miles out when Dave James rattles and drops this "Rutty 4-pt" with a 40-50 yard shot! I bring on Neet Kart®, and after a few pics we slide the deer on my "custom made" plywood sheet, tie on Dave's daypack and, believe it or not, he beat me out of the woods, buck, pack & cart by 5 minutes. Amazing!!...Had I not been there I wouldn't have believed it was so easy!  
-Chuck Williams, Kalispell MT

# NEET KART®

Patent # 6,811,179B2

## Specifications

Storage/Carry size: 6 1/2" x 26 1/2" x 42"  
Weight: 40 lbs. • Powder Coat Finish  
Main frame: 26 1/2" wide x 36" long, square tubular steel of ASTM A500 alloy  
Handlebars: Round tubular carbon steel  
Hand Brake Assembly  
Wheels: 20" - 36-spoke steel  
Tires: 20" x 2.125" with puncture sealant  
Suggested load capacity: 250 lbs. - 400 lbs.  
with two extra handlebars

Made in Montana

## Product Review

CW Engineered Products started the Neet Kart in Libby, MT. CFW Specialties ( Chuck Jr ) continues the legacy in Butte, MT continuing to provide the hunting, emergency rescue and others with the only patented 2-wheel in-line cart available.

Neet Kart® is a unique carrier that defies today's ever changing high-tech innovations with its simplicity and function.

Its versatility & adaptability have received enthusiastic responses and solid respect from hunters, outdoor recreationists, trail clearing workers, and others. Neet Kart enables everyone to pack their heavy loads in and out of frequently rough, adverse terrain, over obstacles (logs, stumps, rocks, etc) up to 14" high.

And just as important, Neet Kart's® patented 2-wheel in-line concept finally allows emergency rescues in remote, inhospitable back country formerly not accessible. With a stretcher securely attached, two people can execute a recovery with Neet Kart® that would ordinarily require 4 to 8 people to maneuver a hand-carry rescue.

Neet Kart® has been proven to save back strain, fatigue, energy and stamina. And when the tough work is done, it can be disassembled into a convenient, compact & lightweight carry/storage mode, easily re-assembled for the next job.

# NEET KART®

Patent # 6,811,179B2

"THE EASY WAY OUT"  
... AND BACK"

**A picture is worth a  
thousand words**

**See for yourself:**

- **The unique 2-wheel in-line concept, a "people-powered ATV"!**
- **The advantages**
  - Save your back
  - Carry no weight
- **The versatility**
  - Compact storage
  - Carry camp gear
  - Haul out the trophy
  - Emergency uses
  - Farm & ranch jobs
  - Environmentally friendly . . .

**Folded For  
Storage**

## For hunting

### “Your ATV in Action”

... the ability to go over obstacles without missing a step or having to fight it ...

**Two miles behind a Forest Service gated road - with a 5-point Muley Buck!!**

**No Trail. . . in rough terrain. . . with a fine spike bull Elk.**

NEET KART®  
Two-Wheel-In-Line Concept & Principle  
Patent # 6,811,179

This illustrates our unique design invention as presented to the U.S. Patent Office. No other cart offers this ability/flexibility.

*Chuck*

## Compact storage

**Carry your camp gear in & out.**

**Continue to your favorite hunting area behind the gate & carry no weight.**

## For emergency use

**The Neet Kart® frame will allow a litter to be cradled and secured**

**so that an injured person can be moved more easily & safely from remote/backcountry locations.**

### A TESTIMONIAL TO THE EFFECTIVENESS OF THE NEET KART®

“Neet Kart® is a functional option for rescue transport on most back country trails. In most situations two people can safely handle a reasonable rescue load. Neet Kart’s® ability to collapse for convenient storage plus its design for adaptability to various litters makes it versatile.”

- Terry Crooks. Mountain Rescue, Libby MT

“For health reasons, I was unable to go trapping, hunting & fishing. I purchased Neet Kart® after seeing it at a local Gun Show. Now I can, once again, enjoy my favorite outdoor activities. Thanks to this innovative tool, walking in the woods is truly a breeze! As a member of the local S&R team, with Neet Kart® and two extra handles we can rescue &/or bring medical supplies to an injured person and also transport the victim comfortably, with little effort. Narrow trails or downed trees are no problem. Neet Kart will go where no ATV or motorcycle would attempt to go. Thanks, Chuck, for such a great, worthy tool!”

-Dan Lockman, B. Ferry ID
